

Sanitised
areas

At pitter self drive customer care is very important to the nature of our business, we are taking extra steps to make sure that every vehicle that leaves our yard has been cleaned and sanitised to the highest standard. We make sure that every contact point such as hand rails, door handles, indicator and light switches are properly sanitised after and before every rental. For minibus and cars we use a specialist antibacterial V-san fogging machine which sanitises all areas of the vehicle. Please see the diagram that shows where we are taking extra care to sanitise.
